Live Remarkable.

Dear Residents

On behalf of the Dainfern Nature Association we hope you enjoy this updated booklet. It is filled with useful information about the Estate, its facilities including nature trails, wildlife, birds and indigenous tree list as well as service providers and classified listings.

The DNA hope you will make use of the map and take a walk in nature and experience the wonderful trails that they have created. You could possibly spot some birds or beautiful creatures on the way.

Don't forget to take a photograph or two and be the lucky winner to have your picture on the front cover of the monthly In Focus magazine.

About the Estate

Dainfern Golf Estate offers the ultimate lifestyle of living in an exceptionally secure environment that has beautifully manicured gardens, a prestigious golf course and a wide variety of educational, shopping and entertainment facilities right on its doorstep.

Dainfern Golf Estate has over 1200 homes since its inception in 1992. It offers an incomparable lifestyle and recreational experience centred around the Gary Player designed golf course enhanced by nature trails, parks, and sports facilities all located in its own 320-hectare "suburb".

The Estate is divided into eighteen villages, each having its unique charm. Dainfern Golf Estate is a sanctuary within the energetic metropolis of Fourways Johannesburg where children can safely ride their bikes in the street or play in one of the eight playparks that the Estate offers.

Dainfern Golf Estate provides a very secure environment for its residents, where there is no fear of crime and an all-inclusive lifestyle that caters to all members of the community.

ESTATE RULES

Dainfern have a code of conduct and Estate rules that can be obtained from the Estate office.

The most common rules are:

- 40km speed limit
- No dogs off leashes
- No loud music
- House paint colours
- Keep side walks maintained
- No cutting or removal of trees on sidewalks without permission
- No Fishing

ARCHITECTURAL RULES

Residents can get a copy of these rules from the Estate office.

SECURITY

One of the best-selling features of Dainfern Golf Estate has always been the security of the Estate.

Security on the Estate is state-of-the-art and the two entry gates at Cedar Road and Broadacres Drive are manned 24 hours a day, 7 days a week with a highly sophisticated access/egress system.

Strict access control procedures are in place, including a biometric system for ease of access for residents and members of the Golf Club.

The Estate is patrolled by a fleet of roving vehicles with armed officers in various locations. The 8.4km perimeter electric fence is monitored by high-tech cameras and are viewed by the control room, which is manned 24 hours a day, 7 days a week.

BIOMETRICS

Residents are required to go to the offices of the Dainfern Homeowners Association to get their biometrics done. This will enable access into and out of the Estate.

GLOvent App

MAIN COMMUNICATION AVENUE

This is the main avenue of communication for all members. Residents are urged to download the App to keep updated with what is happening on the Estate.

ONSITE MEDICAL & FIRE SERVICES

The Fidelity staff are well equipped and expertly trained for dealing with any type of emergency. The Estate also has a leading onsite paramedic service available – SLA (Specialised Logistical Assistance) as well as dedicated onsite fire services offered by FireOps SA.

Contact the Control Room on 011 469 0099

GOLF CLUB

The Dainfern 72 par 18 hole golf course is regarded as one of South Africa's top 100 courses, designed by golfing legend Gary Player.

The course tests the skills of proficient golfers, with play crossing the Jukskei River six times. The course has some of the most scenic yet challenging holes in the country and is one of South Africa's most exciting golf venues.

A focal point of the Estate is the Jukskei River, which flows through the layout with the elevated tee positions that provide magnificent views. The golf course is one of Gauteng's 'must-play' layouts and offers a green lung in the midst of the Johannesburg conurbation.

Bookings:

Contact 011 875 0421/2

to book your next round of golf.

GOLF SHOP

The unique pro-shop provides leading clothing brands together with golfing accessories.

Golf carts are available for hire at the Golf Shop.

CLUBHOUSE AND RESTAURANTS

The beautiful Clubhouse with its modern facilities includes a restaurant, The Grill Room, a Members' Lounge, Halfway House and Conference facilities.

Corporates can host conferences, product launches, and team-building events for their clients and staff in a secure setting.

For residents, there is nothing better than spending a tranquil Saturday or Sunday morning having breakfast on the terrace, with an unparalleled view of exquisite beauty spread out before them overlooking the incredible golf course.

PAVILION

The Pavilion provides a multi-purpose field for sporting activities and inside can host birthday parties, yoga classes and markets.

Families can relax by the swimming pool, play tennis and children can ride their bikes safely.

Dainfern Estate Activities

Complimentary lifestyle events take place throughout the year and create a strong sense of community. Annual events include Fantastic Fridaze, The Easter Egg Hunt, Mother's & Father's Day celebrations, a Christmas Market, Halloween Trick or Treating, and Carols by Candlelight.

RECREATION

Dainfern has a number of activities for its residents throughout the week from Karate, Kumon Maths, Run/Walk for Life, Tennis, Yoga and Church Services.

DAINFERN UNITED FOOTBALL CLUB

The Dainfern United Football Club is affiliated with the Rand Central Local Football Association (RCLFA) league and our teams play all the RCLFA affiliated teams, which matches take place between March and October of each year.

Players from 3 years to 34 years of age are welcome to join the Club and be a part of the Dainfern United Football Club magic!

Dainfern Nature Association

Do you all know the
What, Where and How
about the Dainfern Nature Association?

WHAT

When the Dainfern Estate was first developed it was recognised that the area had some unique biospheres that should be preserved. The area was carefully environmentally surveyed and when the golf course was developed these special areas were preserved and designated on the Estate plan. These areas have been handed to the residents for all to nurture and enjoy.

The Dainfern Nature Association (DNA) was established over 20 years ago and plays an important role on the Estate. The Association is run by a committee of dedicated voluntary residents and supported by management ensuring that these designated nature sensitive areas are maintained and cared for.

WHERE

Nature sensitive areas are right throughout the Estate. In fact, some who haven't had the opportunity to understand their significance perhaps wonder why there is 'just bush' in the middle of smooth mowed kikuyu.

Look carefully and delight in the joy that the huge urbanisation rush in this big city has not taken over, and destroyed the special areas of unique highveld bakenveld, lovely wildflowers, beautiful indigenous trees and a home for some wonderful bird life, water monitors, bats, bush babies and more amazing creatures which you can read about in this booklet.

HOW

In Focus Magazine and Events:

The Dainfern Nature Association receives no funding from the DHA although certain projects are undertaken jointly. In order to carry out these projects the committee has to raise money, hence the invaluable In Focus magazine which residents eagerly look forward to receiving each month. The magazine has grown from a simple couple of sheets of paper with line advertisements into what you see today a digital interactive magazine - a source of Estate and supplier information.

Proceeds from the magazine go towards providing the funding the Dainfern Nature Association needs. Therefore residents are asked to continue to support the advertisers. If you are not receiving your copy,

please contact the Estate office. The magazine is always available on the Dainfern website and App.

Other functions arranged by the Dainfern Nature Association are self funded and provided as a service to residents to get to know them and educate them on the wonderful fauna and flora found on the Estate.

The Chameleon and Reptile Day is an ongoing event due to its popularity. Another popular event has been a talk on birds followed up by walks through the Estate and adjacent areas spotting the birds in their habitat. In the past year there have been talks on the importance of bees, and a talk on bats which was well attended.

The Dainfern Nature Association doesn't only focus on events to raise awareness of nature, but puts any money raised to good use on the Estate for example reinstating wildlife and maintaining sensitive areas:

Wildlife:

The development taking place on the Estate resulted in small mammals and even birds retreating to safer habitats, but thankfully this situation is being reversed. Bush babies and owls have been reintroduced, and the wealth of birds on the Estate is a delight. Do watch out for the water monitor (leguaan) which frequents the streams. To succeed in reinstating wildlife the Estate needs the cooperation of all residents - one such way is to adhere to the request to maintain control of dogs at all times.

Sensitive Areas:

The removal of invasive kikuyu from nature sensitive areas (a huge and expensive task); rehabilitating nature sensitive areas; creating walking trails; planting trees and much more. There are always plans afoot to do more. Please read the In Focus magazine to keep abreast of the latest developments.

RESIDENT PARTICIPATION

Residents are welcomed and encouraged to get involved - the committee is not for a select few. The Dainfern Nature Association acts as the custodian of certain nature areas of the Estate and as such belongs to all. If residents have any suggestions, wish to help or even serve on the committee, please contact the DNA.

WAY FORWARD

The Dainfern Nature Association owes its success to a few special residents (both past and present) and it has been because of the dedication of these individuals that the Association goes from strength to strength. Please

continue to support them and join in wherever you can.

DNA TROPHY

The Dainfern Nature Association awards this beautiful trophy to a person who has performed an outstanding task in supporting the wildlife, plant life, bird life & community on the Estate.

The DNA trophy has an honoured place at the entrance to the Clubhouse within the glass cabinet for all to view. Nominees are welcomed throughout the year.

BIRD WALKS

Regular bird walks are held throughout the year. Dates and times can be found in the newsletter or within the Dainfern In Focus magazine.

See feature on "How to recognise Birds" and a **Bird Checklist on pages 20-23**.

Nature Trails

Have you walked the nature trails on the Estate?

The Dainfern Nature Association with approval from the DHA decided over 15 years ago that it would be a wonderful idea to create nature trails within the Estate. This would take time, planning and money, however with the funds from the Dainfern In Focus magazine and with a dedicated team, the trails were slowly developed along with the map of the 12 Nature trails. **See the map on pages 16 & 17.**

OLIVIA'S WALK

(No bikes and dogs must be on leashes)

Olivia's Walk was the first trail, which starts at Bentwood Close, the trail meanders through a lovely, wooded area, and open grassland, which borders along the Steyn City and the Estate's servitude fence and ends at the 6th T. box and rain shelter. The water monitors are often seen along the sand path, as this is where small creatures come through between the two Estates and if one is lucky may even see them in the gullies.

At the start of the trail, one will notice tree bowls with stones, these were created as nesting grounds for the spotted Dikkop birds to lay their eggs, as over time it was noted that this became one of their favourite breeding grounds for these striking theatrical birds.

Wild hare and an abundance of bird life and insects can be seen along this lovely walk.

ROCKY RIDGE

As the name implies is a very rocky section, so one needs to mind one's steps. In July when the wild aloes are in flower, residents will be sure to encounter some lovely sun birds and enjoy this spot as one walks over the koppie and down into the Combretum Trail.

COMBRETUM TRAIL

This is a short walk which starts at the top of Rocky Ridge, down the steep stairs, past an old olive tree (*Olea europaea* subs. *africana*) on the left, and through a thicket of bamboo, *Celtis africana*, *Combretum erythrophyllum*, Bush willow trees, *Mystroxyylon ethio picum* the Highveld Kooboo-berry, *Ziziphus mucronata*, Buffalo-thorn and *Gymnosporia buxifolia* the common spike thorn.

It is a quick walk which meanders along parallel to the river, up and over the gabions at the end to the low lying bridge to the start of the Willowgrove picnic and flood plain. Egyptian geese, Black duck, and water monitors are often seen along this stretch of the river.

CASUARINA LANE WALK

This trail goes all the way up along the northern/eastern servitude road, down and past the workers track to the Clubhouse via Cormorant River Walk.

WETLAND & GRASSLAND AREA

The Wetland and lovely grassland area, pass the little dam and walk up through the lovely succulent and aloe gardens behind the 12th rain shelter area. In the late winter the flowering aloes are a sight to be seen and enjoyed.

continue on page 14

Nature Trails

continued from page 13

HOOK THORN / CAFFRA

Cut through from driving range to 14th fairway and Pavilion.

BUFFALO THORN RIVER TRAIL

Named after the Tree. A beautiful short walk along the river.

SAW GRASS

Sensitive area (no bikes and dogs have to be on leashes). This is a lovely walk from the 3rd fairway or from Saw Grass Village, which meanders along the paths and five dam areas.

This is definitely where one will see a number of water birds and ducks and is a lovely spot to chill out, relax and enjoy the tranquil surroundings.

BUTTERFLY WALK

The name speaks for itself, flowers and trees were planted to attract butterflies, birds and insects, this is a lovely tranquil spot to sit.

If one continues up with the top path and all the way up following the path, you will arrive at Highgate dam, another lovely area, which has recently had an upgrade of lovely succulent planting and is well worth a visit. This joins up with the 15th and 16th fairways and all along the pretty planted flower bank, to the 16th hole.

CANDLETHORN WALK

Candlethorn Walk along the 4th fairway, this walk gets its name from the unusual Acacia hebeclada (Candle pod acacia).

The pods of this Acacia grow upwards, giving the pod a candle appearance when they are on the tree and quite an unusual sight to see.

POPLAR MARSH

Poplar Marsh can be entered via the 3rd fairway, Galloway entrance, the Glades or from the 9th fairway another lovely bird walk and pretty area.

COMORANT RIVER WALK

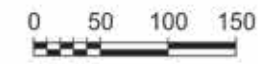

Workers track to the Club House along Cormorant River Walk, and into Trent Stream, another beautiful walk along the gully which meanders along to Trent Dam, and Trent Weir and along the 2nd and 3rd fairways to Saw Grass.

Map of the Estate

Nature Trails, Owl / Bat boxes and Golf Course Map

Key: — Nature Trails / ● Owl Boxes

* Trails used at own risk.

Owl and Bat Boxes

The Dainfern Nature Association are extremely passionate about raising and releasing owls on the Estate. Over the years owl and bat boxes have been erected encouraging owls and bats into the area. By increasing the owls it will help reduce the rodent population as this is a good source of food for them.

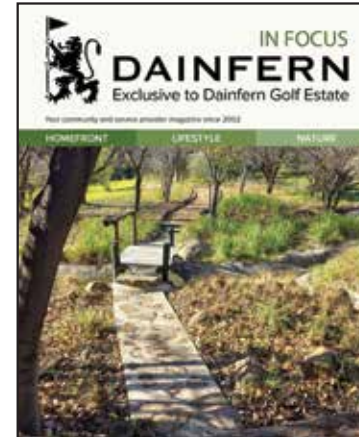

POISON

The Dainfern Nature Association appeal to residents to reconsider using rat poison that can cause secondary poisoning amongst the bird and wildlife. Nature will take its course if patient, or alternatively use humane rat traps.

Whilst walking residents are encouraged to spot the owl and bat boxes and if any are in need of repair or missing, please contact the Dainfern Nature Association. Boxes are subject to changes.

See the **map on pages 16 & 17** for where to find the owl and bat boxes.

In Focus Cover Photographic Competition

We invite all residents to enter into the Dainfern In Focus front cover photographic competition.

Please submit your photographs of landscape / wildlife or something of beauty from within the Estate to cobbie@global.co.za

Winning photos will be placed on the cover for one month. Other entries that do not make the front cover will be used within the magazine.

Please support the work of the Nature Association:

To advertise in the magazine,
please contact Colleen on
082 898 6566 or

Bryanston Avian, Exotic and Small Animal Clinic (BAESAC)

BAESAC is a mixed animal clinic treating and caring for all small animals. Not only do they treat dogs & cats, their expertise also extends to birds, reptiles, small mammals (rabbits, guinea pigs, chinchillas, hamsters, degus), monkeys and other wildlife. Contact number - 011 706 1381.

How to recognise Birds

- **BILL:** The shape and length of the bill are clues to its feeding habits and identification. Seed eaters have thick stubby beaks while those of insect eaters are usually thin, sharp and pointed.
- **LEGS:** Waders generally have long legs whereas those of ducks and geese are short. Leg colouration is also important in identification.
- **WINGS AND TAILS:** The open wing and tail shapes can assist in pin-pointing the species.
- **CRESTS:** Head crests in many species can be raised or lowered at will. If time allows, watch the bird for at least a few minutes.
- **FACIAL PATTERNS:** Chin colour, cheek patches and eye markings are important to take note of.
- **EYES:** Eyebrows, as well as rings around the eye and eye colouration are important diagnostic features.
- **BREAST SPOTS:** Some birds have a barred breast pattern while others have spots and longitudinal stripes.
- **CAPS AND CROWNS:** These are very distinctive and helpful in sorting out some of the Plovers and Woodpeckers.
- **RUMP PATCHES:** These are particularly noticeable when birds fly up and away from you. Take note of colouration and distinctive markings.
- **TAIL MARKS:** Take notice of patterns such as bars and stripes especially those displayed by the hawks.
- **WING PATTERNS:** Dull or evenly coloured birds will disclose their identity when they stretch their wings or fly off.
- **WING BARS:** A dull coloured species will often display a distinct or colourful wing bar.
- **WALKING HABITS:** Birds move in various ways. Wagtails walk, Sparrows hop and Thrushes run.
- **FLYING HABITS:** Kites hover, Francolin dash for short distances, Kingfishers fly with rapid wing beats near to the water and straight as an arrow, and Flycatchers do complicated aerial acrobatics.
- **SOUND AND CALLS:** The call or sounds may assist in identification.

Bird Checklist

211 BIRD SPECIES

This checklist includes all bird species seen in Dainfern Golf Estate since 1992.

Bird names used are as defined by the BirdLife South Africa List Committee. The list includes overflying birds and vagrant records. If you see an additional species please report it to André Marx at 083 411 7674 or email andre.marx112@gmail.com.

Use the abundance code to determine the likelihood of seeing a particular species and to determine whether or not the species is migratory.

A = Abundance Code

- 1: Common – regularly recorded
- 2: Scarce – occasionally recorded
- 3: Uncommon – seldom recorded
- 4: Vagrant – local rarity
- a: Summer Migrant – Eurasian or intra-African summer visitors (mostly Sep-Apr)
- b: Winter Migrant – regional or altitudinal visitor (mostly May-Sep)

Wildlife on the Estate

Dainfern Golf Estate has an abundance of wildlife that thrive within the natural environment. Some maybe seen occasionally which can be very exciting. Here are some of the creatures you may come across, but not limited to include genet terrapins, otters, snakes, dassies, the odd monkey and more.

As with all wildlife, everyone is asked to respect and not to approach or encourage them with food. This way all can live in harmony with each other. If you see an injured creature or bird, please contact the Dainfern Nature Association (DNA) or Security or the Estate office (Refer to page 3 for contact details).

HEDGEHOG

Found singly, in pairs or in small groups the hedgehog is mainly nocturnal. They are extremely inactive in winter however not uncommon to sight on the estate during summer.

Omnivorous they will eat termites, insects, snails, frogs, lizards and small rodents. They also enjoy birds eggs, certain wild fruits and any manner of vegetable matter.

LESSER BUSH BABY

Nocturnal and very gregarious they occur mostly in pairs or family groups. They are very vocal using both scent and sound to communicate when out feeding at night. They are arboreal so are excellent jumpers and rarely need to venture to the ground.

They feed on insects, flowers, fruits and acacia gum. They make their nests out of grass and leaves in the hollows or holes of trees.

BULL FROG

The bull frog is one of the biggest frogs and can weigh up to 2kgs. It has a large mouth, sharp teeth and very little webbing on its feet. It is quite aggressive especially the males who will defend his eggs if approached.

The African Bullfrog is carnivorous and will feed on anything it can fit into its mouth. The male only makes calls during rainy season.

BLACK-BACK JACKAL

The black-backed jackal is common in the Fourways area and many of them live in parks and other open areas.

Black-backed jackals are omnivores, and they mostly feed on invertebrates, such as beetles, grasshoppers, crickets, termites, millipedes, spiders, and scorpions. They also feed on small mammals, such as rodents, birds, lizards and snakes. Mainly nocturnal, the mammals can often be heard late at night in the suburbs. The Estate is fortunate to sometimes have the jackal visiting from neighbouring estates.

LIZARDS

Lizards are one of biggest groups of reptiles found on earth with over 4000 species. Lizards are egg laying animals with scaled skin. Many of them live on trees, while some live in water. They are found in almost every part of earth. Each of them has different characteristics related to body structure, habitat and many more factors.

They have the ability to shed their tails to run away from their predators. This action is called, autonomy.

MONGOOSE

Of the ten species of mongoose endemic to South or Southern Africa you are most likely to (and quite frequently) sight in the Estate the Slender or Black Tipped Mongoose. The Slender Mongoose is diurnal and solitary with a wide habitat tolerance.

They will eat snakes, rodents, insects and scorpions. They are also known to take to the trees in search of birds eggs. (It is also possible to sight the Yellow, White Tailed or Water Mongoose in the area).

PORCUPINE

Those who have never seen a porcupine in its natural habitat are desperate to see

one; those that have seen porcupine in their natural habitat (which is invariably newly planted shrubs) don't want to see them again! Frequent visitors to newly planted gardens, porcupines are frequently sighted on the Estate.

The porcupines are the largest African rodent, nocturnal they can be found alone, in pairs or even in small groups. They will frequent holes or rocky crevices during the day. A lover of newly planted bulbs they will also eat tree bark and are known to gnaw on bones.

WATER MONITOR

The water monitor or as we fondly refer to it in South Africa as the leguaan, is Africa's largest lizard with its distinctive tail that is longer than its body. A frequent sight in the Estate they can be seen ambling across roads and fairways and are commonly found in residents fish ponds, for good reason, they eat frogs, small fish, crabs and even birds.

Interestingly they lay about 40 eggs, normally in active termite mounds in this way, the eggs are incubated at a constant temperature. The incubation time of the eggs varies, and the young may hatch any time between 4 to 12 months later.

The Indigenous Tree List

| SIGHTINGS | OFFICIAL NATIONAL TREE NO. | NAME | | DESCRIPTION |
|-----------|----------------------------|--------------------------------------|------------------------|-------------|
| | | LATIN | COMMON | |
| □□□□ | 162 | Acacia caffra | Common Hook Thorn | Deciduous |

TIME TO HEAL
Reflexology

REFLEXOLOGY can help!

Relieves stress and tension • Improves blood and nerve supply • Assists the body to heal from health conditions

Reflexology is a treatment that deals with the certainty that there are reflexes on the hands and feet that are connected to all glands, organs and system of the body. **Reflexology is an exclusive science** of using a thumb and finger technique on these reflex areas and once stimulated can bring the body back into balance.

The **main aim of the treatment is to balance a system** in a diseased state by **releasing energy blockages and toxins, improving blood and nerve supply.** This promotes healing and **optimal health on an emotional and physical level.** Reflexology is for any age from babies to the elderly - male and female.

Areas worked on:

- Digestive system
- Respiratory system
- Endocrine system
- Lymphatic system
- Skeletal and nervous system
- Senses
- Reproduction
- Skin
- Urinary
- Cardiovascular
